

BIOLOGY CLASS 12 BATCH

Human Reproduction

DPP-04

1. Lower narrow end of uterus is called
 - (1) Urethra
 - (2) Cervix
 - (3) Clitoris
 - (4) Vulva
2. Identify the correct sequence of the parts
 - (1) Uterine body → Cervix → Vagina
 - (2) Uterine body → Vagina → Cervix
 - (3) Uterine fundus → Vagina → Cervix
 - (4) Uterine fundus → Cervix → Vagina
3. Birth canal is formed by
 - (1) Cervical canal
 - (2) Vagina
 - (3) Uterine body
 - (4) Both (1) & (2)
4. Which group represents external genitalia of human female?
 - (1) Labium minora, labium majora, vagina
 - (2) Labium minora, labium majora, cervix
 - (3) Labium minora, labium majora, clitoris
 - (4) Labium minora, labium majora, oviducts
5. Fleshy folds of tissue which extend down from the mons pubis and surround the vaginal opening are
 - (1) Mons pubis
 - (2) Labia majora
 - (3) Labia minora
 - (4) Hymen
6. The opening of the vagina is often covered partially by a membrane called
 - (1) Labia minora
 - (2) Hymen
 - (3) Clitoris
 - (4) Prepuce
7. Cushion of fatty tissue covered by skin and pubic hair is
 - (1) Mons pubis
 - (2) Labia majora
 - (3) Clitoris
 - (4) Vestibule
8. Female external genitalia do not include
 - (1) Hymen
 - (2) Cervix
 - (3) Clitoris
 - (4) Mons pubis
9. Read the following statements and choose the correct option
 - A. The presence or absence of hymen is not a reliable indicator of virginity or sexual experience
 - B. The hymen is often torn during the first coitus. However, it can also be broken by a sudden fall or jolt, insertion of a vaginal tampon etc.
 - (1) Both statements are correct
 - (2) Both statements are incorrect
 - (3) A is correct and B is incorrect
 - (4) A is incorrect and B is correct
10. Which of the following is a finger like structure and lies at the upper junction of the two labia minora above the urethral opening?
 - (1) Clitoris
 - (2) Oviduct
 - (3) Ampulla
 - (4) Chorionic villi
11. Mark the incorrect statement regarding female external genitalia
 - (1) The female external genitalia include mons pubis, labia majora, labia minora, hymen and clitoris
 - (2) Labia majora is a cushion of fatty tissue covered by skin and pubic hair
 - (3) The clitoris is a tiny finger-like structure which lies at the upper junction of the two labia minora above the urethral opening
 - (4) The hymen is often torn during the first intercourse
12. Clitoris in human female is
 - (1) Vestigial organ
 - (2) Analogous to penis in male
 - (3) Homologous to penis in male
 - (4) None of the above

13. Match the following

a	Clitoris	i.	Paired folds of tissue under the labia majora
b	Labia majora	ii.	Opening of the vagina is often covered partially by a membrane
c	Labia minora	iii.	A tiny finger-like structure which lies at the junction of the two labia minora
d	Hymen	iv.	Fleshy folds of tissue, which extend down from mons pubis and surround the vaginal opening

- (1) a – iii, b – iv, c- i, d – ii
- (2) a – iv, b – iii, c- i, d – ii
- (3) a – ii, b – iv, c- i, d – iii
- (4) a – i, b – iv, c- iii, d – ii

ANSWER KEY

1. (2)
2. (1)
3. (4)
4. (3)
5. (2)
6. (2)
7. (1)

8. (2)
9. (1)
10. (1)
11. (2)
12. (3)
13. (1)
